Professional Experience

Clementius LLP | Software Developer
01/2023 – Present

Key responsibilities / Contributions:

- Develop and maintain Node.js backend applications using Express.js.
- Design and implement user interfaces for web applications using React.js, ensuring a seamless and responsive user experience.
- Deploy and manage backend and frontend applications on cloud platforms, including DigitalOcean and Vultr.
- Configure Server instance of backend using nginx.
- Develop and maintain cross-platform mobile applications for Android using React Native.
- Create and deploy secure and efficient smart contracts on the Ethereum and Polygon networks using Solidity.
- Implement decentralized applications (DApps) that interact with smart contracts to provide decentralized solutions.
- Communicate effectively with team members, providing updates, discussing project requirements, and addressing challenges.
- Identify and resolve issues in a timely manner, applying strong problem-solving skills to debug and troubleshoot code.
